PARKER·HALE
HIGH PERFORMANCE
HUNTING RIFLES
E GLEN."
of T. J. BARRATT, Esq.
SIR EDWIN LANDSEER, R.A.
se are lines from "The Legends of Glenorchy"
ich Landseer so finely illustrated in the "Monarch
the Glen," his recognised chef-d'ouvre.
Painted in 1850, it was intended to occupy a panel in
the Peer's Refreshment Room of the Houses of Parlia-
ment. At a sale in 1897 it realised the enormous sum
of £7,245, the highest price ever paid for one of the
painter's pictures.
Sir Edwin Landseer was born in 1802 and died in
1873.
oduced by the kind permission of T. J. BARRATT, Esq.

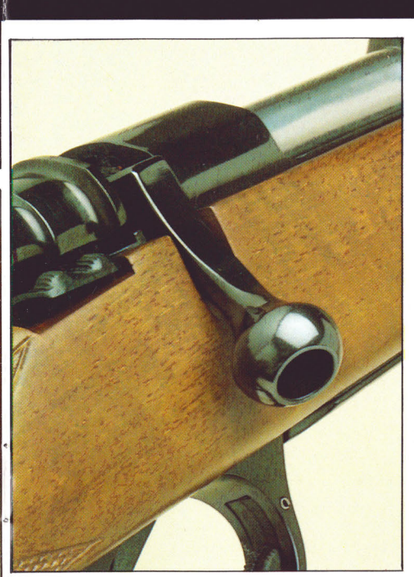
M81 Classic

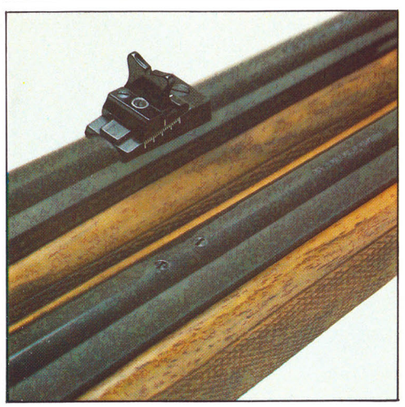
1100 Lightweight

M81 Classic

A Classic from Britain's foremost maker of hunting rifles. The Mauser bolt action is unequalled for elegance and reliability and has been recognised as the finest basis for practical hunting rifles for over 80 years. Countless attempts to modify the design have failed to improve on the original which we are proud to use in this and other classic models.

We use only individually selected high grade figured European walnut for the M-81 Classic, which we then glass bed to the action for extra stability. Every aspect of the rifle is designed for the practical shooter. There is a true oil finish so the straight comb stock will not need a complete re-spray if scratched or dented. The chequering is cut by hand, not by machine, and wraps round the full forend. The elegant pistol grip has a palm swell and discreet rosewood cap. The Q.D. sling swivels are specially designed with stops so they will not scar the stock. There is a choice of sighting options, the barrel being drilled and tapped for Williams sights but those who mount a scope may prefer the clean lines of the plain barrel. The receiver accepts a wide range of standard screw-on bases for scope mounting. The M-81 Classic has a one piece all steel Oberndorf style trigger guard with hinged floor plate and all steel parts except the polished bolt and extractor are finished to a lustrous deep blue-black.





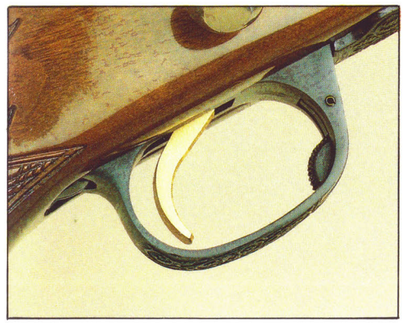
1100 Lightweight

The newest model in the Parker-Hale range is developed to meet the demand for a lighter-than-average rifle, which combines very fast handling and portability without the drawbacks of ultra light rifles. Like the M-81 Classic, the 1100 Lightweight has an internally webbed Pachmayr Old English recoil pad for extra shooting comfort. The slim profile barrel is cold forged in our own factory and shares the qualities of long wearing and great accuracy which characterise all Parker-Hale rifles. We have lightened the robust Mauser action by fitting a hollow bolt handle and slim anodised alloy trigger guard with integral hinged floor plate magazine. Careful attention has been paid to the balance of the rifle which though light, gives very little felt recoil thanks to the well proportioned stock with Monte-Carlo cheek piece. Hand cut chequering provides a firm grip all round the elegant schnabel forend and at the full pistol grip with palm swell. Swivel studs are fitted and the walnut stock is finished in a durable, weather-proof satin varnish. The barrel is drilled for Williams sights, as illustrated.

All Parker-Hale rifles are factory test fired and independently tested at the Birmingham Proof House, your guarantee of safety.

1200 Super

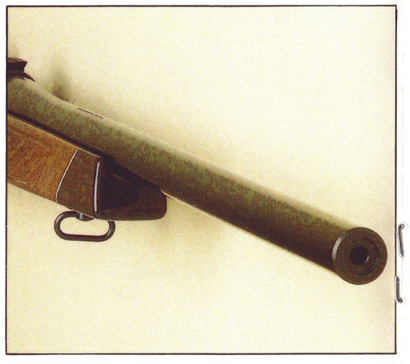
1000 Standard

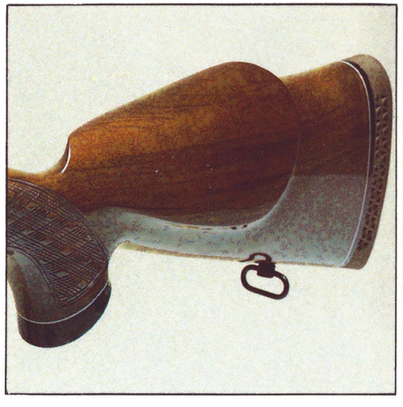


1200 Super

The Model 1200 Super needs little introduction. This best selling Parker-Hale hunting rifle has been in continuous production for many years and its popularity is undiminished. Available in a wide range of calibres with a choice of high gloss or oil finished stock, it features a roll-over high comb cheek piece, skip-line chequering, solid rosewood forend tip and grip cap with white line spacers and fully engraved anodised aluminium trigger guard and Oberndorf style magazine which has internal ribs to hold cartridges firmly under recoil, preventing mashed bullet tips. The 22ct. gold plated trigger is combined with a silent acting side safety catch which locks trigger, sear and bolt handle.

Variants on the 1200 Super include the 1200C with detachable steel clip magazine and steel trigger guard as well as the 1200V Varmint rifle with heavy (4¼lbs) free floating target quality barrel which is drilled for long tube target scope bases as well as receiver mounted sights. Full specification of all these models are given on the last page of this brochure. Both the 1200 Super and 1200C Super Clip are offered in popular magnum calibres and are fitted with double-ventilated recoil pad, flip-up rear and ramp mounted bead front sights with hood and 1" loop sling swivels.





A popularly priced top quality Mauser action hunting rifle which shares many of the characteristics of the 1200 Super. The trigger is adjustable (after removal of the stock) for weight, creep and overtravel. The safety catch, in addition to locking both trigger and sear, holds the bolt firmly closed when applied to prevent the handle snagging on undergrowth or obstructions and leaving you with an empty chamber just when a quick shot is wanted.

1000 Standard

The satin varnished stock is of close grained European walnut with a steel recoil bar for extra strength. Flip up rear and hooded bead front sights are fitted and the Monte Carlo cheek piece stock is designed for comfort either with open sights or receiver mounted scope. There is a chequered butt plate with white line spacer and grip cap and sling swivels are fitted.

2100 Midland

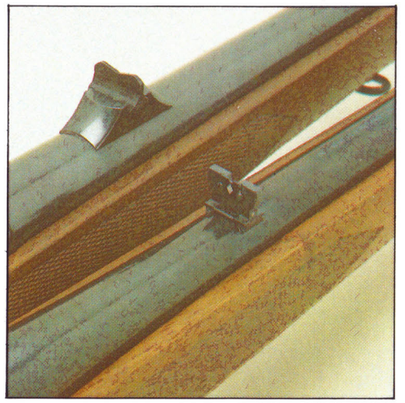
1100M African Magnum

2100 Midland

The Midland Gun Company, a Parker-Hale subsidiary has a long established reputation for robust well made guns at at a popular price. We have continued this tradition with the Midland 2100 hunting rifle which incorporates many of the features of the Mauser action models.

In common with all Parker-Hale rifles the Midland 2100 has a high quality hammer forged barrel which gives top accuracy and very long life. The walnut stock is finished in hard wearing satin varnish and is reinforced with a steel recoil bar. Cut chequering at pistol grip and forend provides a firm grip and the Monte carlo stock is designed for use with receiver mounted scope (dovetail base blocks for Parker-Hale Roll-off mounts are supplied but not fitted) or the factory fitted open sights.

The bolt action is exceptionally strong with twin front lock lugs, rear safety lug and powerful Mauser type claw extractor. The hinged floorplate staggered box magazine is of anodised aluminium and the adjustable single stage trigger mechanism incorporates a silent side safety catch conveniently located for operation by the right thumb.



1100M African Magnum

We have been building these powerful rifles for the control of dangerous and thick skinned game for many years. They incorporate features which long experience in the harsh conditions of the African bush have shown to be essential. Absolute reliability is of paramount importance and we devote much time to ensuring that our African Magnum rifles meet this requirement in every respect. Since most shots at dangerous game must be taken at close range and often with very little time, we fit a virtually indestructible shallow V rear sight for the fastest aim and a 180° flag safety mounted on the bolt sleeve – safe, reliable and fumble free in use. For those who prefer to mount a scope, a 45° low scope safety is available (as illustrated) and the receiver is drilled and tapped for base blocks. The specially lengthened steel magazine has a hinged floor plate which will not open accidentally and the stocks, as well as being heavily reinforced and glass bedded, are weighed to reduce the effects of recoil from these powerful calibres.

Set Trigger As an optional extra available for fitting to most models of Parker-Hale rifles, we offer a precision set trigger mechanism which may be used either as a 'hair trigger' when set by pushing forward on the lower limb or as a conventional single stage trigger with comfortable broad 'shoe'.

Roll-off Mounts

Tough lightweight scope mounts in two heights and two middle tube sizes – under tube clearance .23" on low rings and .486" on high rings. Available for 1" or 26mm dia-scopes. Roll off mounts are designed for rapid removal of scopes and replacement without shift of zero.

Manufactured by Parker-Hale from high duty anodised aluminium with quick release clamp knobs and steel recoil studs. A wide range of base blocks is available to fit most rifles in current production.

For all Parker-Hale brand rifles use bases BA22/28
The Midland 2100 rifle takes bases BA39/40

Roll-off mount rings reference numbers
LOW 1" – RALS3
HIGH 1" – RAHS3
LOW 26mm – RALS4
HIGH 26mm – RAHS4
